

Eco-communication

As a semiconductor manufacturer, the NEC Electronics Group promotes eco-communication in order to build good relationships with all of our stakeholders.

Communication Activities

We make environmental information available to the public in the effort to promote global information transmission.

We publish an environmental management report, disclose environmental information on our website, and participate in symposiums and exhibitions to facilitate global disclosure of information on our environmental efforts.

Website information disclosure

We provide environmental information services on our website, as one of the important tools we use for eco-communication. Our environmental policies, the content of our environmental efforts, and environmental reports are available to the public at the site.

Awards from external organizations

At the 4th PRTR Awards 2007 of the Center for Environmental Information Science held in February 2008, NEC Semiconductors Kyushu Yamaguchi's Kumamoto Kawashiri Plant received the PRTR Award for Excellence (the second most prestigious award after the Grand Prize) and the Judges' Special Award. The PRTR awards are given to recognize corporate activities by business operators that take the lead in regulating chemical substances and engage in proactive communication with local citizens to obtain public understanding for the importance and implications of this effort.

External presentation activities

The Electronic Journal 173rd Technical Symposium was held by the Electronic Journal Co. in February 2008. The theme of the symposium was “Energy-saving, environmental, and disaster prevention strategies in semiconductor and LCD factories.” NEC Electronics gave a presentation on our environmental impact reduction activities and risk management.

Environmental fair

NEC Semiconductors Yamagata exhibited at “Environmental Fair Tsuruoka” in September 2007, which is organized by Tsuruoka City. The panel exhibit presented the interaction of semiconductor factories with the environment and activities the company undertakes to combat global warming, conserve water, and regulate chemical substances. The presentation helped local citizens who visited the fair to learn more about these efforts.
