**Photo 1** "Celebrating First Section Market Listing" scrolling across the reader board at TSE

On July 24, 2003, nine months after our company's establishment, we were pleased to have NEC Electronics stocks listed on the first section of the Tokyo Stock Exchange (TSE). With this listing we hope to expand our management reform more than ever before. In addition, we are planning business operations in a transparent and reliable manner. Furthermore, through this listing, we are now able to directly raise funds, make swift investment decisions, and present high-quality and efficient semiconductor solutions to our customers in a timely manner.

It is our hope that we will be able to make even a small contribution to our customers' business success, and we believe nothing is more important than pursuing better customer satisfaction. We are therefore striving to expand manufacturing reforms and improve quality, while further polishing our solution proposals and technology. We are continuing our efforts so that we may be chosen as our customers' best business partner.
